

Analytic Laboratories

Developing methods where a method does not exist.

Submission Check List

1. Fill out our Chain of Custody Record Form, checking the box in the upper right-hand corner for the full ISO 22241-2 Analysis.
2. Send in a quart/liter of sample. Bottle should be pre-rinsed with the DEF you are sending in. Discard the rinse, refill, and seal tightly.
3. If sending UPS or FedEx, click the notification box so we can track the sample coming in and inform you if there are any delays. And, with the weather Syracuse has, there are delays!
4. Keep at least 1 liter retain of each batch as an insurance against complaints or if retests need to be done.
5. Send samples to:

6034 Corporate Dr.
E. Syracuse, NY 13057
